

# Accessories enrich the hearing experience

Accessories portfolio

# Accessories add value

At Unitron, we think accessories should enrich your hearing experience. So our full range of convenient and easy-to-use accessories are designed to solve real listening challenges. We make them simple to use and we make sure the natural sound you love carries through them.

Remote control 2

Product shown at actual size

# Essential features are a click away

This remote is perfect for those who want discreet, straightforward control over the essential features on their hearing instruments.

## Who is it best for?

For those who want an easy-to-use remote.

# Enjoy a finer level of control

This full-featured remote control lets you easily make a wide range of adjustments to your hearing instruments, including real-time control over listening comfort and clarity.

## Who is it best for?

For those who want more control over their listening experience.

Smart Control remote

Micro CIC remote

Product shown at actual size

# Discreet and simple control

The pocket-sized micro CIC remote gives you a choice between magnetically adjusting your volume or switching between programs.

## Who is it best for?

For those who like the added convenience of having further control over their hearing.

uStream

Product shown at actual size

# Easy, discreet connectivity

This small clip-on accessory provides wireless streaming to cell phones, tablets, TVs, FM receivers and MP3 players. uStream can also be used as a remote control.

## Who is it best for?

People who want discreet control of their hearing instruments and stereo streaming.

# Connect. Control. Enjoy.

uDirect™ 3 provides connectivity with maximum battery life to cell phones, tablets, TVs, FM receivers and MP3 players. Conveniently acts as a remote.

## Who is it best for?

People who want to control their hearing instruments and enjoy long periods of stereo streaming from their entertainment devices, like the TV.

uDirect 3

# Television the way it was meant to sound

uTV™ 3 wirelessly sends stereo audio from the television directly to both hearing aids through uDirect 3 or uStream for easy, enjoyable listening. You control the volume of the streamed audio signal right on the uTV 3 accessory or on the uDirect 3/uStream. Plus it acts as a cradle to conveniently charge and store the uDirect 3/uStream when not in use. uTV 3 also connects to stereo and computer systems.

## Who is it best for?

For those who like to be entertained by TV and music.

uTV 3

# Hear it from the source

uMic™ is a personal wireless microphone system that lets you hear your companions easily in challenging listening environments. The speaker can attach uMic using the built-in clip or lanyard loop and it wirelessly sends audio directly to both hearing instruments through uStream, uDirect 3 or uDirect 2.

## Who is it best for?

For those who need to hear a single sound source from a distance or in very noisy situations.
